

**Lelaina:**

Handwritten long division on grid paper. The problem is  $5472 : 12 = 5310$ . The student has written the quotient as 5310. The work shows the following steps:

- 54 divided by 12 is 5, with a remainder of 4. The student has written 50 and crossed out the 0.
- 47 divided by 12 is 3, with a remainder of 11. The student has written 36 and crossed out the 6.
- 112 divided by 12 is 10, with a remainder of 0. The student has written 112 and crossed out the 2.

Lelaina hat **Schwierigkeiten beim Überschlagen der Quotientenziffer** („12 passt in die 54 fünf Mal“/ „12 passt in die 112 zehn Mal“). Außerdem **multipliziert sie falsch** („5 mal 12 gleich 50“/ „10 mal 12 gleich 112“).
